Customer No. 30734

## Amendments to the Claims:

This listing of claims will replace all prior versions, and listings of claims in the application:

1. (Cancelled)

2. (Previously Presented) An apparatus according to claim 4, wherein the item is a

blood bag.

3. (Cancelled)

4. (Currently Amended) An apparatus for supporting an item in a refrigerator

cabinet, comprising:

a frame having rails arranged for the item to be suspended therefrom;

a plurality of slotted strips vertically disposed mounted to the cabinet; and

a plurality of brackets, wherein each bracket is mounted proximal engages the

slotted strips and supports the frame, wherein the brackets each have a first end, and wherein the

first end has a generally upwardly facing U-shaped channel that receives and supports the frame

and wherein the frame has peripheral rails, and wherein channels and rails are sized so that only

the channels support the rails at more than one point along the peripheral rails.

5. (Previously Presented) An apparatus according to claim 4, wherein the frame has

a plurality of generally parallel transverse rails.

6. (Previously Presented) An apparatus according to claim 4, wherein the brackets

are rigidly attached to the frame.

Docket No. 87289.2160 Serial No. 10/000,352

Customer No. 30734

7. (Currently Amended) An apparatus according to claim 4, wherein the brackets

have a first end that supports the frame, and have a second end that is mounted within connected

to a slide.

8. (Previously Presented) An apparatus according to claim 7, further comprising a

slide guide mounted to a housing, wherein the slide moves along the slide guide.

9. (Previously Presented) An apparatus according to claim 6, wherein the brackets

are adjustably mounted to the slotted strips.

10. (Cancelled)

(Previously Presented) An apparatus according to claim 13, wherein the item is a

blood bag.

11.

12. (Cancelled)

13. (Currently Amended) An apparatus for supporting an item in a refrigerator

cabinet, comprising:

means for suspending the item;

means for supporting the suspending means; and

means for height adjustably mounting the supporting means to a housing the

eabinet, wherein the supporting means comprises a bracket having a first end with a generally U-

shaped channel that receives and supports the suspending means, and a second end that engages

<u>a</u> the mounting means, wherein a frame has peripheral rails, and wherein channels and rails are

sized so that only the channels support the rails at more than one point along the peripheral rails.

14. (Currently Amended) An apparatus according to claim 13, wherein the supporting

means comprises a bracket that supports the suspending means and is mounted within attached to

a slide.

15. (Previously Presented) An apparatus according to claim 14, further comprising a

slide guide mounted to the cabinet, wherein the slide guide slideably supports the slide.

16. (Original) An apparatus according to claim 15, wherein the slide guide is height

adjustably mounted to the cabinet.

17. (Currently Amended) An apparatus according to claim 13, wherein the a frame

includes a plurality of transverse rails.

18. (Withdrawn) A method for supporting an item in a refrigerator cabinet,

comprising the steps of:

installing a plurality of brackets on the inside of the cabinet; and

placing a frame on the brackets to be supported by the brackets.

19. (Withdrawn) A method according to claim 18, wherein the item is a blood bag.

20. (Withdrawn) A method according to claim 18, wherein the installing step includes

the step of adjusting the height of the brackets.

Docket No. 87289.2160 Serial No. 10/000,352 Customer No. 30734

- 21. (Withdrawn) A method according to claim 18, wherein the brackets are mounted to a drawer slide.
- 22. (Withdrawn) A method according to claim 18, further comprising the step of adjusting a location of the brackets along a perimeter of the frame.
